

Please amend Claim 3 as follows:

<sup>15</sup>  
Claim ~~3~~. (Amended) An improved toilet paper dispenser [of the type,] in which a roll of toilet paper is supported on a rotatable spindle secured at each end thereof by a bracket, wherein the improvement comprises:

- a1
- a. means for rotating the spindle;
  - b. means for playing music operatively connected to the means for rotating the spindle,

whereby, music is activated by movement of the means for rotating the spindle.

<sup>13</sup>  
14. (Amended) The improved toilet paper dispenser of claim 1, further comprising a wall mountable housing with a pivotable cover, said pivotable cover provides protection for the toilet paper, and wherein the means for playing music comprises an audio tape player integral with said housing,

a2

said housing further having a panel with at least one manually actuated button, one of said at least one manually actuated button being operatively connected to one of a nightlight, the audio tape player, and [the] means for dispensing an aromatic fragrance.
